

Talk on Opportunities for Engineers in the Middle East

A talk on opportunities for engineers in the Middle East was provided by Mr. Justin T. Francis, alumni (2006-2010) from our institute to the final year students of Mechanical Engineering and Production Engineering branches (2017 pass out batch) on Friday, January 06, 2017 at the Main Seminar Hall at 10:00 am . He provided an over view of the various engineering sector and current demands. Mr. Justin asked the students to be strong with the fundamental and be conversant with the concepts, proper terms & terminologies. Experience is very important, so he requested all freshers to grab the opportunities that come their way and utilize them to gain exposure and to build upon their skills.
