

# Attended a Short Term Training Programme at IIT Madras

Mr. Hareesh and Mr. Alex Chacko attended a short Term Training Programme during 13-18 March 2017 on Modelling, Simulation, Experimental Approaches of Unconventional manufacturing Techniques at IIT Madras .The STTP Broadly covered the topics of modeling, simulation and experimental approaches of unconventional manufacturing techniques (UCM).

Their Feedback is as follows:

We have got a chance to learn, integrate and effectively handle the diverse industrial problems in UCM. we have also got an opportunity to demonstrate our knowledge and skills in fundamentals and state-of-the-art in UCM.This STTP help us to chose right sources of energy for diverse materials processing, optimal process characteristics and quality standards when they involve in product development.
