ME student project gets funding from CERD

*MED bags CERD funding for another student project !!!*

The CERD of APJAKTU has granted financial assistance to a student project submitted by the Mechanical Engineering Department of the College. The tenure of the project is one year. The project is basically related to the estimation of deformations in the composite laminates in different processing conditions. The findings of the project are likely to have some very useful industrial applications as there are numerous applications for composites in automotive and aerospace industry. A team of four students of S7 BTech (ME) batch consisting of Nikhil John, Rahul P, Rohith M Krishnan and Shibin P M, Sreerag A, guided by Mr. Praveen A P (Assistant Professor, ME), prepared and submitted the project proposal.
