

NSS units set up herbal garden in College

As part of the Herbal Plants and Home Remedies Project of OISCA, the NSS units of the College initiated the setting up of a herbal garden at the back side of the main block of the College to showcase traditional Indian medicinal plants and their therapeutic properties. The NSS volunteers cleaned the area and made raised bed soils and planted seeds of different medicinal plants like Adalodakam, Aaryaveppu, Kariveppu, Koovalam, Panikurka, Thippaly etc. in the raised bed soils.
