

MCA Dept launches a new value-added course

The MCA Dept of the College started a new value-added course targeted at the students of the S4 MCA (2016 admissions) batch last week. The course, titled “Web Application Development Using PHP and AJAX”, was inaugurated by Mr Paul Chakola, Head of Training & Placement Dept of the College, in a brief ceremony held in the Computer Lab of the Dept on 22.02.2018. The course is intended to give a firm foundation in PHP and AJAX technologies so that the students will be better prepared and better equipped for doing the mini and main projects in the higher semesters and also to face recruitment processes in the job market. The Coordinator and the Co-coordinator of the Course are Mr Sajay K R and Mr Dijesh P, both Associate professors in the MCA Dept.
