

# Batch II completes value added course in WordPress organised by CSE Dept

The second batch of students who had enrolled for the value added course “Building Professional Websites using WordPress” have successfully completed their studies on 23 July 2018. The course had been organised by the Dept of Computer Science & Engineering. Students from CSE and MCA Depts enthusiastically participated in the course which was conducted as fully hands-on sessions. The Coordinator and the main instructor of the course was Mr Shali K R, Server Administrator.

Each student attending the course was provided a free web hosting facility for learning purposes and that was one of main highlights of the course. The students are expected to complete a project before 15 August 2018 as part of the course.
