

V-CAIR Student Club organises technical talks on deep learning and AI by experts from TCS

The AI Student Club functioning under V-CAIR (Vidya Centre for Artificial Intelligence and Research), jointly with CSE Department Association, organised a Technical Session on “Neural Networks and Deep Learning” on 22 November 2018 from 11 am to 1 pm in Advanced Computer Lab. The session was handled by Ms Sheetal and Mr Lokesh from Tata Consultancy Services. The session was attended by selected MTech (CSE) and BTech (CSE) students, who were currently doing projects in neural network area. Ms Sheetal explained the possibilities and project experiences in TCS on neural network models used for text based application data. Mr Lokesh explained the possibilities and limitations of building and training models. Also the talks included parts of AI, its genres, current stage

of research and development, the position in future and more . After the formal session students shared their ideas and queried their doubts.
