Dear Fayha,

You're a Boilermaker! Please accept my enthusiastic congratulations on earning an admission offer to Purdue University's Master of Engineering Management (MEM) graduate program for the Fall 2019 semester. We have received more applications for Fall 2019 admission that ever before in the history of our program, which makes your accomplishment even more noteworthy. Gaining an offer of admission has never been more difficult.

Joining Purdue University as a member of our MEM program means becoming a part of our institution's dynamic 150-year history of technological innovations and landmark accomplishments - [The first human being on the moon](#), [the construction of the Golden Gate Bridge](#), [the first Wiki application](#), [the first female member of the National Academy of Engineering](#), [the record breaking, Super Bowl winning quarterback](#), [the pioneer in global agriculture](#), [the visionaries of the next 150 years of engineering](#), and so much more.

Ms Fayha Abdul Kareem (B Tech in Production Engineering in the 2016 pass-out batch) has got an admit card to join the prestigious Purdue University, a public research university in West Lafayette, Indiana, USA, for pursuing the MS programme in Engineering Management. Her admission to Purdue University is also based a highly favourably worded testimonial from Dr Sudha Balagopalan, Dean-Academics.

Excerpts from a letter from Ms Fayha to Dr Sudha Balagopalan:

Dear Ma'am,

I feel extremely happy to let you know that I have received an admit from Purdue University for Engineering Management. It is a great opportunity to study in one of the top 10 graduate schools in US with distinguished alumni like the first person to ever walk on moon.

Thank you very much for the recommendation letter and all the help given.

I shall always work towards making Vidya proud. Please do let me know how I can contribute to Vidya in any ways possible.

Thanks & regards,

Fayha.

Know Ms Fayha

Academic achievements in college

- University 1st rank in 5th, 6th and 8th Semesters and 3rd rank in 7th Semester
- Received district topper proficiency award from Engineer's association ,Thrissur.

Co- curricular activities

- Served as the student Magazine Editor (2013 – 14)
- Actively served the responsibility of being in college

senate

- Won various competitions in singing during Arts Festival
