

Ms. Atulya

Vidya student clears the Neudesic selection process.

Ms. Atulya,
placed with
Neudesic
Technologies

Neudesic Technologies is on a mission to be the global leader

in technology powered business innovation. They aim to help their customers close the gap between technology and desired business outcome by bringing together the best talent, innovative products and a broad array of services.

Neudesic's recent placement drive for the B Tech 2020 pass out batch of students was full of small programming challenges and puzzles. Some of these include solving problems like string reversal, finding the cube root, and from subject domain like finding the shortest distance between a cab and passenger, Konigsberg bridge problem, coloring problem – least number of colors to be used such as that adjacent boxes have different colors etc. Atulya Nair from 2020 pass out Computer Science Engineering stream cleared these grueling selection process to come on top with a placement offer. Congratulations Atulya !!
