

PE student makes amazing micro art carvings on pencil tips

Sajin T Babu, a student of S6 B Tech (PE) batch of Vidya, shines in the field of pencil carving. Pencil carving is an incredible carving technique wherein a micro artist puts his heart and soul onto a pencil. This is all about creatively carving a teeny, tiny, fragile pencil tip with hands. This carving is done with a lot of attention, passion, and patience. It's hand carved with special knives and needles under a strong source of Light, removing tiny specks of graphite (the pencil lead) at a time.
