

An innovative product from Vidya: A hands-free token dispenser

Here is an innovative product from Vidya: A hands-free token dispenser.

Vaisakh Unnikrishnan and Sooraj R of the S4 B Tech (CSE B) batch developed a Hands-Free Token Dispenser, an innovative product highly useful in the time of the current COVID-19 pandemic. A model of it was installed in the Oncology Dept of Govt. Medical College, Thrisuur on 04 June 2020 in the presence of Dr Shabna (Oncology Dept). They had developed the product under the “Earn While You Learn” scheme offered by Vidya Skill Centre. The concept could be transformed into a product only because of the support of Mr Anil M of Vidya Skill Centre and the motivation rendered by their Group Tutors Ms Remya P C and Ms Vidya M.
