

MCA Dept faculty members attend workshop on network and system administration

MR SAJAY K R

MR DIJESH P

MS APARNA S BALAN

Mr Dijesh P (Asso Prof, MCA Dept), Mr Sajay K R (Asso Prof, MCA Dept) and Ms Aparna S Balan (AP, MCA Dept) attended a one-day online workshop on “Network and System Administration” organised by Federal Institute of Science and Technology, Mookkannur, Angamaly on 10 May 2021. The topics discussed included automaton techniques, hyperisors and virtual machines, and installation and configuration of Laravel.

What is Laravel?

Laravel is a free, open-source PHP web framework, created by Taylor Otwell and intended for the development of web applications following the model-view-controller (MVC) architectural pattern and based on Symfony. Some of the features of Laravel are a modular packaging system with a dedicated dependency manager, different ways for accessing relational databases, utilities that aid in application deployment and maintenance, and its orientation toward syntactic sugar.
