

# Mint seedlings distributed along with TC and CC

The students who came to the College campus to collect their TC and CC after completing their studies were shocked when they saw mint seedlings outside the College Auditorium. They were happy when they later found out that it was their teacher's gift to them. Mr Arun Lohithakshan (AP, ME Dept) was the person who implemented this novel idea. He told the students not to forget nature conservation even when they reach the heights of their careers.
