

**This year also Vidya crosses
300 placement offers mark!
Celebrate Vidya!!**

This week, the 2022 pass out students of Vidya achieved the milestone of crossing 300 placement offers mark. Congratulations!

Despite the pandemic situation, the technology segment opened up and Vidya students went out and grabbed good placement offers with some of the world's best corporates. Compared to previous years, there is also a hike in compensation packages offered with top salary offered being Rs.10 lakh per annum.

This is the fourth year the placement figures have gone past the 300 offers mark. Right from registration, to aptitude test and to interviews the recruitment processes have gone fully online. Often some last mile connectivity issues remain; however, companies have set in processes to understand these kind of situations and they provide alternative arrangements to the candidates. Another trend is that this year several M

Tech students have bagged internships leading to placement offers.

The top recruiters this year as of date (in alphabetic order):
