

## **Department of Artificial Intelligence and Machine Learning**

As part of Vyvidh'23, the Department of Artificial Intelligence and Machine Learning at Vidya Academy of Science & Technology held their first-ever two-day technical festival, "REGALIA," on March 17th and 18th, 2023. The participants enjoyed the activities and events of the fest, creating a memorable experience for everyone involved.

The main highlight of the festival was "ColorCove", the digital painting competition which was held in PG Lab, which provided the necessary digital environment for the competition. Participants were given the opportunity to showcase their artistic skills using a range of digital tools and techniques. The judges were impressed by the level of creativity on display. Mr. Nikhil won the first prize of Rs 2000, while Ms. Devapriya Rajan of Vidya Academy of Science & Technology secured the second prize of Rs 1000.

Another interesting event was the VR experience, which allowed participants to explore new worlds and environments using virtual reality technology. Participants were thrilled by the opportunity to try out this exciting technology and gave enthusiastic responses.

The Department of Artificial Intelligence and Machine Learning also set up a pavilion with many fun games and activities. The pavilion also had charts showcasing the latest developments in the field of Artificial Intelligence and Machine Learning.

The department staff members and first-year students have put in a lot of hard work and dedication to organize this event. Despite their lack of experience, everyone involved gave their maximum effort and worked tirelessly to ensure the successful conduct of the program.
